

Grown Ups - Parents & Carers,

The dream for this kids page (LOVE to LEARN for kids) is to create a space for children that nurtures a love for knowledge, respect and care of nature & that inspires creativity.

We want to celebrate our Australian context & the amazing animals that are part of our environment.

This is depicted in the background landscape with the colours & forms of the habitats (rivers, open plains, bushland, mountains and desert) & the endangered or rare nocturnal animal characters that have been profiled (bilby, feathertail glider, sugar glider, platypus and pygmy possum).

The Nature Nay character has been inspired by my daughter, Nay, From an early age, her 'happy place' was being around animals, reading her Bindi Irwin books & watching animal programs.

As a proud parent I wanted to create fun & engaging resources that you can trust.

To ensure that our resources are age appropriate, educational & inspiring we seek advice from educational consultants & obtain reference information from reputable websites such as: Zoos Victoria, Worldwide Fund for Nature (WWF Australia) & Australian Wildlife Conservancy (AWC.)
